

Mineral Wool:

It is also called slag wool. It is an ideal material for most insulation application due to its favorable characteristics for application. It is fire proof , dirt proof and water repellent.

It has low thermal conductivity. It is fibrous material having number of enormous minute air cell.

Characteristics:

- Material
- Dimensions
- Packing
- Max. Withstand Temperature
- Fire Properties
- Moisture Content
- IS standard
- Slag Wool
- Loose Bulk Packing
- 40 Kg
- 750 Dec C
- Fire Resistant
- Less than 2%
- IS 3677

Application:

- Cavity Insulation
- High temperature insulation
- Turbine Casing insulation
- Boiler insulation
- Steam and hot water pipe Insulation
